

## General Practitioner – Cornwall St Medical Centre

Cornwall St Medical Centre (CSMC) is a mixed billing, multidisciplinary practice, located on the CBD fringe next door to the Princess Alexandra Hospital. CSMC is a flagship practice for the UQ Health Care (UQHC) group.

Working as a GP with CSMC means you have access to:

- Collegiate support from UQHC's team of GPs, many with UQ academic titles
- a diverse range of patients and clinical services, and
- excellent support from our nursing and reception staff.

You will have the opportunity to build your practice and patient base, and develop areas of special interest, such as chronic disease management / integrated care, skin, or homeless medicine. Our successful candidate will also have the option of also providing care at our St Lucia practice, attracting those interested in campus health, particularly sexual and mental health.

We offer a range of remuneration options, including % billings contract or salary. As UQHC is not-for-profit, you can also access attractive salary sacrificing arrangements. 19AB exemption via academic appointment is available to appropriate candidates.

[UQ Health Care](#) is 100% owned by the University of Queensland (UQ). UQHC operates multidisciplinary primary health care centres dedicated to providing a compassionate service, and the highest quality, integrated, multi-disciplinary care. Our innovative programs and services provide you the opportunity to develop skills and experience not normally available in general practice.

Our links to the UQ Faculty of Medicine and Faculty of Health and Behavioural Sciences provide opportunities for GPs to pursue teaching and research interests and tap into our professional development program. This comes with access to UQ Library resources.

UQHC offers great opportunities to help you build advance your career whilst helping us to deliver on our vision.

### ***Our Vision***

To be the partner of choice in creating the future of healthcare.

### ***Our Mission***

Creating healthier communities by providing the best care to every patient through integrated healthcare, education and research.

In addition to a full suite of standard services, UQ Health Care delivers unique programs and services not provided by general practices. Here is a sample:

- Our **Homeless Service** plays a vital role in coordinating care delivery to this most vulnerable of populations, partnering with multiple stakeholders;
- The **Metro South Complex Diabetes Service (*Beacon Clinic*)** is a collaboration with Princess Alexandra and Logan Hospitals, consists of a multidisciplinary team led by specialist endocrinologists delivering personalised, interprofessional healthcare, proactive chronic disease management, and ongoing access to preventive health measures resulting in improved well-being, with a focus on behaviour change.;
- The **GPs in Secondary Schools Project**, based on the success of the Victorian ‘Doctors in Secondary Schools’ program, is designed to make primary health care more accessible to students. In collaboration with Children’s Health Queensland, UQHC GPs provide medical advice and health care to those students most in need, with the objective to help young people to identify and address any health problems early;
- The **Cornwall St Respiratory Clinic** is one of the Federal Government’s 100 dedicated respiratory clinics as part of its COVID-19 response. 12 GPs, four RNs and four reception staff operate the clinic, which provides assessment and treatment for patients with respiratory symptoms, including COVID 19 testing and communication with the patient’s regular GP, ensuring continuity of care.
- **UQ Healthy Living** is a state-of-the-art facility with world-leading strength, aerobic and rehabilitation equipment promoting healthy ageing and wellbeing in older adults through access to a range of health disciplines. Drawing upon the latest research from around the world, it is a focal point for researchers across UQ working to address the challenge of an ageing population. The focus is on applied aspects of healthy ageing, to achieve the goal of living well in older age.
