

POSITION DESCRIPTION

Position Title:	Physiotherapist - Lifestyle Management Programs.
Organisation Unit:	UQ Health Care Ltd, Logan Healthcare Centre.
Employment terms:	0.6 FTE, 12month contract, renewable.
Salary:	Negotiation.
Reports to:	Clinic Manager.

BACKGROUND

Organisational Environment

Metro South Hospital and Health Service (MSHHS), Griffith University (GU), The University of Queensland (UQ) Health Care, the Brisbane South Primary Health Network and Health and Wellbeing Queensland have formed an alliance to develop a model of integrated chronic disease care, which leverages the expertise and resources of a range of partners, recognising that successful prevention and management of chronic disease requires a collaborative approach. Key to the initiative will be the implementation of a proof of concept – Logan Healthcare Centre, that links treatment with prevention through a Lifestyle Management Program. The Centre has been established to pilot the model of integrated care that connects care for complex chronic disease and empowers patient self-management, with a view to subsequently developing a “Centre of Excellence” in Integrated Care for MSHHS (the Logan Health & Wellbeing Hub). The Logan Healthcare Centre will deliver Lifestyle Management Programs for Type 2 Diabetes Mellitus (T2DM) made possible through significant funding support from Health and Wellbeing Queensland (HWQld). In 2021, the focus will expand to combined diabetes/cardiac and diabetes/renal clinics, with GPs with special interests (GpWSIs) working alongside Endocrinologists, Cardiologists and Nephrologists to manage this patient cohort.

A multidisciplinary approach to address the physical, mental, social and economic determinants of chronic disease across the spectrum is required for a successful strategy which will include:

- A comprehensive lifestyle management program to activate the patient and achieve behaviour change and lifestyle modification.
- Through existing partnerships with UQ, Griffith and UQ Health Care, an interprofessional team of allied health professionals will expand the model, with deployment of a student-infused allied health workforce in an environment of teaching and research;
- The program will compliment other HWQld and BSPHN programs and initiatives.
- The Lifestyle Management Program will be delivered at the Logan Healthcare Centre and consist of:
 - Initial interprofessional assessment, group sessions (education, exercise), plus 1-on-1 consults, supported by technology (telehealth, shared eHR, devices and an app)
 - Exercise and diet plans; psychology to assist behaviour modification; pharmacist for medication management, and social work to address socioeconomic barriers.

- Reassessments at 3 and 6 months to ensure continued motivation, connection to HWQId and BSPHN community-based programs for ongoing healthy lifestyle maintenance.

The university partners will design and implement an evaluation framework to assess the effectiveness of these new approaches to patient care, and leverage the depth and breadth of research talent across both universities to further contribute to clinical service development, as well as provide access to additional revenue streams through grant funding.

DUTY STATEMENT

Physiotherapist : Lifestyle Management Program, Logan Healthcare Centre.

This is a clinical/clinical education role involving the development and delivery of Lifestyle program material within the Lifestyle Management Programs for Complex Type 2 Diabetes, persons with newly diagnosed diabetes and pre-diabetes (in the future).

Primary Purpose of Position

- To provide leadership in the development and delivery of the Physiotherapy components of the Lifestyle Management Program.
- Identify and help establish opportunities for the Lifestyle Management Program's sustainable development, growth with a focus on addressing mobility and physical barriers to enable successful participant outcomes.
- Contribute to inter-professional team-based model of care, in an optimal student learning environment.

Duties and responsibilities to Include, but are not limited to:

Clinical Service Delivery:

- Provide direct clinical services to participants including intake assessments, 1:1 consults, telehealth reviews and group education sessions as required to facilitate positive outcomes.
- Identify and address mobility, musculoskeletal issues that may impact participant's wellbeing, chronic disease management and quality of life.
- Identify and address modifiable physical and mobility barriers for participants to attend and complete the Lifestyle Management Program journey.
- Work closely with the interprofessional team to assist in maximising the effectiveness of team interventions where identified physical and mobility-related barriers to participation have been identified.
- Assist in making appropriate connections and linkages to healthcare and community and resources for ongoing maintenance of gains made within the LMP.
- Facilitate opportunities for social programming, early intervention and prevention initiatives.
- Contribute to the customisation of program materials for "hard to reach" and "at risk" populations for increased uptake and effectiveness of programs.
- Work with the Clinic Manager to contribute to Physiotherapy components of effective Clinical Governance including clinical service reviews, clinical management software system reviews, risk management, clinical audit and review of patient feedback/surveys.

- Provide advice and assistance to ensure Physiotherapy clinical practice materials are updated regularly to reflect current practice systems and processes.
- Work with the Clinic Manager and interprofessional team in aligning service delivery with the strategic direction of the centre and ensure these strategies are implemented effectively and efficiently.

Clinical Prevention

- Contribution to the development of staff and student induction program inclusive of clinical prevention principles from a Physiotherapy perspective.
- Active promotion and facilitation of prevention principles to be applied during Lifestyle Management journey for participants.

Clinical Education

- Participate in the fostering of the development of a positive environment where inter-professional models of education and delivery of care are able to flourish.
- Work with Clinic Manager and Clinical Liaison Managers from UQ and Griffith University Physiotherapy schools to ensure appropriate student education processes and models of clinical supervision to support students' learning.
- Oversee Physiotherapy student orientation covering information and guidance on policies and clinical procedures for service delivery within the Lifestyle Management Program.
- Provide clinically appropriate interprofessional supervision where required.
- Monitor, evaluate and report on student's development of clinical skills and knowledge, utilizing the APP linkup assessment platform.
- Ensure all physiotherapy students complete prevention module as part of induction process.
- Liaise with University based clinical education liaison managers and/or course coordinators regarding prospective Physiotherapy student placement bookings and related administration.

Reporting Relationships

You will report to the Clinic Manager, Lifestyle Management Programs, Logan Healthcare Centre.
