

UQ Health Care Ltd is a not-for-profit primary care, clinical innovation and research organisation, 100% owned by the University of Queensland. We promote and facilitate the University's mission; We make connections, build partnerships, and deliver high quality services; We deliver healthcare innovation underpinned by teaching excellence and research capability.

Our Vision

To improve the health and wellbeing of the communities we serve through excellence in clinical care, preparing the next generation of health professionals and generating and applying new knowledge.

Our Mission

To advance the University's interests through integrated healthcare, education, research and innovation in shaping the primary health care models of the future.

Our Values

Excellence, Quality, Integrity, Respect, Teamwork, Empathy.
